Item	Part Number	Description
1	13562	Floor console finish panel cup holder
2	—	Parking brake switch electrical connector
3	—	Parking brake switch screws (4 required)
4	2B623	Parking brake switch

Removal and Installation

NOTE: The electronic parking brake (EPB) system must be reset following the EPB system reset procedure if the battery has been disconnected. Refer to Electronic Parking Brake (EPB) Resetting in the diagnostic section.

1. Disconnect the battery. For additional information, refer to Section 414-01.

2. Release the floor console finish panel cup holder from the floor console finish panel and position it aside.
3. Disconnect the parking brake switch electrical connector from the parking brake switch.
4. Remove the 4 parking brake switch screws.
5. Release the parking brake switch from the floor console finish panel cup holder.
6. To install, reverse the removal procedure.
